

Justin Morrow – 08/14/26

Assignment: CSD-440 Module 1.3 (My First PHP Programing Assignment)

## Justins First PHP Program

The 1st line is using "echo" to display the first variable value

The 2nd line is using "print" to display the second variable value

The 3rd line is using "echo" to display the calculated value of variable 1 + variable 2

The 4th line is using "print" to display the calculated value of variable 1 + variable 2

```
$var1 = 47  
$var2 = 20  
$var1 + $var2 = 67  
$var1+ $var2 = 67
```

## Welcome to XAMPP for Windows 8.2.12

You have successfully installed XAMPP on this system! Now you can start using Apache, MariaDB, PHP and other components. You can find more info in the [FAQs](#) section or check the [HOW-TO Guides](#) for getting started with PHP applications.

XAMPP is meant only for development purposes. It has certain configuration settings that make it easy to develop locally but that are insecure if you want to have your installation accessible to others.

Start the XAMPP Control Panel to check the server status.

## Community

XAMPP has been around for more than 10 years – there is a huge community behind it. You can get involved by joining our [Forums](#), liking us on [Facebook](#), or following our exploits on [Twitter](#).
